Positions

Sep 2023 – Ongoing	Research associate (100%) <i>Institute of Systems Neuroscience, University Hospital Düsseldorf, Germany</i> <i>INM-7: Brain and Behaviour, Research Centre Jülich, Germany</i> Working group: Biomarker Development (Jürgen Dukart)
Sep 2022 – Aug 2023	Doctoral fellow (stipend) <i>Clinician Scientist Program, Max Planck School of Cognition, Germany</i> - Graduate courses in neuroscience - Lab rotation: INM-1: Structural and Functional Organisation of the Brain, Research Centre Jülich (Katrin Amunts Timo Dickscheid) - Lab rotation: Max Planck Institute of Psychiatry, Munich (Elisabeth Binder Victor Spoormaker)
Apr 2022 – Aug 2022	Research assistant (65%) <i>INM-7: Brain and Behaviour, Research Centre Jülich, Germany</i> Project: Linking cortical thickness development to multilevel brain systems
May 2019 – Jan 2022	Student research assistant (20%) <i>Child Neuropsychology, University Hospital RWTH Aachen, Germany</i> Diverse projects involving neuroimaging, behavioral data analysis, and visualization
Sep 2013 – Aug 2014	Voluntary service <i>Samuha Samarthya, India Service Civil International, Germany</i> - weltwärts program, German government-funded - Creating barrier-free environments for people with disabilities in rural South India

Education

Sep 2022 – Ongoing	PhD in neuroscience <i>Clinician Scientist Program, Max Planck School of Cognition, Germany</i> - Cumulative thesis on the neurobiological basis of human brain imaging - Supervision: Jürgen Dukart Simon Eickhoff Julian Koenig Svenja Caspers - Completion planned in 2027
Dec 2017 – Sep 2022	Doctor of medicine (Dr. med.) <i>Child Neuropsychology, University Hospital RWTH Aachen, Germany</i> <i>INM-7: Brain and Behaviour, Research Centre Jülich, Germany</i> - Thesis: Recovery-associated resting-state activity and connectivity alterations in anorexia nervosa - Supervision: Kerstin Konrad Jürgen Dukart Jochen Seitz - Grade: <i>summa cum laude</i> (with distinction)
Oct 2014 – Nov 2021	Medical studies (state examination) <i>RWTH Aachen University, Germany</i> - Elective subject: Clinical neuroscience - Clinical internships: Child and adolescent psychiatry (6 mos) Adult psychiatry (1 mo) Internal medicine (4 mos) General surgery (4 mos)

Grants & Research Funding

2025	Co-investigator: DFG Research Grant • Project: Linking brain functional trajectories in neurodevelopmental disorders to underlying neurotransmitter systems • Substantial contribution to conception and writing • Direct supervision of two researchers employed on the grant, until 2028
------	---

Awards & Scholarships

April 2025	Heine Research Academies (HeRA) travel grant of the Heinrich Heine University • To present at SOBP 2025 in Toronto, Canada
Dec 2024	DGPPN 2024 "Best Free Talks Abstract" award • See conference section, awarded with 500€
Oct 2023	"Borchers Badge" for excellent dissertations at RWTH Aachen University • For the medical doctoral thesis "Recovery-associated resting-state activity and connectivity alterations in anorexia nervosa" passed with distinction in 2022
Jul 2023	German Academic Exchange Service (DAAD) travel grant • To present at OHBM 2023 in Montréal, Canada
Jun 2023	72nd Lindau Nobel Laureate Meeting (Physiology and Medicine) Lindau, Germany • Participation as "Young Scientist", supported by Research Centre Jülich
Sep 2022	Doctoral fellowship of the Max Planck School of Cognition • Clinician Scientist Program

Supervision & Teaching

Postdoctoral	Co-supervisor: Rachel Bamberger, Research Centre Jülich (since Jan 2026; DFG grant)
Doctoral	Co-supervisor: Naimi Quitschau, University Hospital Leipzig (since Jan 2026; DFG grant)
Bachelor's	Co-supervisor: Laura Buchloh, University of Regensburg (completed 2026) Co-supervisor: Alfred Dawalibi, Aachen University of Applied Sciences (completed 2026)
Supervisor training	Workshop "Leading & Coaching Doctoral Researchers", JuDocS qualification program for supervisors, Research Centre Jülich (Mar 2026)
Teaching	Substitute lectures, Translational Neuroscience (MSc), Heinrich Heine University Düsseldorf

Academic Contributions & Personal Skills

Software Tools	NiSpace Neuroimaging Spatial Colocalization Environment mapconn Neurophysiologically Enriched Organization of Functional Connectivity (NEOFC) ABAnnotate Gene-category enrichment analysis of brain maps using Allen Human Brain Atlas expression data
Peer Reviews	<i>Journal of the American Academy of Child and Adolescent Psychiatry</i> <i>Neuropsychopharmacology</i> <i>Translational Psychiatry</i> <i>Schizophrenia Bulletin</i> <i>Neuroimage</i> <i>Neuroimage Clinical</i> <i>Cortex</i> <i>Frontiers in Human Neuroscience</i> <i>BMC Psychiatry</i> <i>BMJ Open</i> <i>European Journal of Neuroscience</i>
Extracurricular Activities	Cohort Student Representative of the Max Planck School of Cognition (since Sep 2022) Co-organizer of the INM-7 Journal Club , Research Centre Jülich (since Oct 2023)
Programming Languages	Python since 2021 (<i>example</i>) R since 2020 Matlab since 2019 (<i>example</i>) German native speaker English professional proficiency

Conference Presentations & Workshop Participation

Jun 2026	Organization for Human Brain Mapping (OHBM) Annual Meeting Bordeaux, France Poster: Linking human brain functional connectivity to underlying neurotransmitter systems
April 2025	Society of Biological Psychiatry (SOBP) Toronto, Canada Talk: Molecular imaging-informed biomarkers link typical and atypical functional brain synchronization to underlying neurotransmission
Dec 2024	Congress of the German Association for Psychiatry and Neurology (DGPPN) Berlin, Germany Talk: Evidence of dopaminergic modulation of resting state functional connectivity alterations in psychosis
Aug 2024	Cologne Summer School in Biological Psychiatry Cologne, Germany Participation in lectures and practical exercises on state-of-the-art methods in biological psychiatry
Jun 2024	Organization for Human Brain Mapping (OHBM) Annual Meeting Seoul, South Korea - Poster: NiSpace – Neuroimaging Spatial Colocalization Environment - Poster: Neurotransmitter systems explain lifespan changes of human resting-state brain activity
Jul 2023	Organization for Human Brain Mapping (OHBM) Annual Meeting Montréal, Canada Poster: Human cortex development is shaped by molecular and cellular brain systems
Mar 2023	Minerva Symposium: Interactive Brains - From Methods to Applications Tel Aviv, Israel Invited talk: Revealing the neurobiology underlying interpersonal neural synchronization with multimodal data fusion
Mar 2023	Meeting of the German Association for Child and Adolescent Psychiatry (DGKJP) Essen, Germany Poster: Linking cortical thickness development to molecular and cellular brain systems
